We have developed a low colour Scottish Extra Pale Ale Malt for low colour beer styles such as lager, blondes and pale ales. Made from the same barley as our Scottish Ale Malt, its 100% Scottish grown.

It is perfectly suited to the traditional UK brewing style where a single strike temperature is used as the malt has a moderate to high level of modification which gives excellent extract, flavour and run-off.

Use it at 100% for lagers and pale ales or mix in some speciality malts for just about any hop driven beer style.
